

***My experience is that
Raizer makes people
who have suffered a fall
feel safer.***

– Home helper

RAIZER®

by Liftup

Raizer is a mobile lifting chair that helps people who find themselves on the floor to be up again in just a few minutes. Raizer can be operated by a single assistant and requires only limited physical effort beyond the help of a supportive hand.

Raizer guarantees a safe and stable lift

- It can be operated by just one person.
- Is battery-driven and lifts automatically.
- Ensures an ergonomically correct lift, avoiding overexertion of your back and arms.
- Helps someone who has suffered a fall to an almost standing position in just a few minutes.

- Relieves stressful situations because people can be helped by an assistant in their own homes.
- You can quickly get on with your next task.
- A person who has suffered a fall can be assisted by sending a home help, thus avoiding calling the emergency services.
- No strain on the paramedic or the patient.

Minimal manual handling

- Easy to transport in two bags.
- Raizer can also be transported on a trolley, bicycle, or as a rucksack.
- Lifting using Raizer requires only a minimum of physical effort.
- Fast and easy assembly (3 min.) right next to the person on the floor.
- Is easy to operate in a confined space inaccessible to traditional lifts.
- Raizer requires only minimal training, so is easy to use for inexperienced personnel.
- Raizer is easy to pack into a car, where it can also be charged.
- Easy to clean and disinfect.

AN EXCELLENT INVESTMENT, BOTH PRACTICAL AND ECONOMICAL

- 
- A person with long brown hair, wearing a light blue shirt and dark shoes, is kneeling on a light-colored wooden floor. They are adjusting a grey and black device, the Raizer, which is positioned under a person's leg. The device has a black control panel with a red dial and a black handle with a red button. A blue line with two dots points from the text below to the red button and the red dial. The person's leg is in blue jeans.
- The Raizer design has colour codes that guarantee fast assembly and disassembly.
 - Extra equipment such as a trolley (with stair wheels), a bike bracket and connectable remote control.
 - Fast and easy disassembly and packing (2 min.).
 - Can be used on all types of surfaces.
 - Durable materials guarantee a long lifetime.
 - An excellent time-saving investment.
 - Savings using Raizer can be documented.
 - Contact Liftup for more information relevant to your situation and needs.

Equal opportunity for all

Liftup designs and develops welfare technology aids based on our values of dignity, safety and equal opportunity for all. As a professional helper, you will see that Raizer ensures stability and safety, and also helps you save time, maintain a healthy working posture, and protects you from overexertion.

At Liftup A/S our principle is to work continually with the innovative development of welfare technology products. Liftup was founded in 2003, and is a wholly privately-owned Danish enterprise.

Aesthetics, design and safety are essential in everything we do within the field of welfare technology. We don't make machines, we make welfare aids that guarantee the dignity of their users.
